## CARBON DIOXIDE

**B: FLAMMABLE  
LIQUIDS**

**E: ELECTRICAL  
EQUIPMENT**

**2.0 kg**

**3.5 kg**

**5.0 kg**

**APPLICATIONS:** CO<sub>2</sub> Extinguishers are designed for use on E Class fires, involving energised electrical equipment such as switchboards, electrical motors and electronic equipment. They are also suitable for use on B Class Flammable Liquid fires. CO<sub>2</sub> is a gas that penetrates and spreads to all parts of the fire area. These extinguishers are more effective when used indoors or where wind is not a factor, however they are NOT recommended for use within confined spaces.

**CONSTRUCTION:** Our CO<sub>2</sub> fire extinguishers feature a lightweight aluminium seamless cylinder which is manufactured to Australian Standards. The robust forged brass chrome plated valves incorporate a pressure relief valve, with a stainless steel handle and lever fitted.

Australian Standards Approval AS1841.6

CAPACITY kg	CYLINDER DIAMETER mm	HEIGHT mm	OVERALL MASS (Approx)	DISCHARGE TIME (Sec)	RATING	MODEL
2.0	110	520	5.1	8 - 9.5	5B:E	FXC20
